It may be an asset flip and all, but at least it's cheap, honest about what it provides, and not broken on arrival. I had some fun making a video using this game as an example. Check out the second half of the video if you want to see some gameplay and a brief overview.

<https://www.youtube.com/watch?v=ix0ZuR7XO9k>. I love the drum kit sfx for weapons. Game succeeds in being "so bad it's good" but also being pretty good for what it is, Cheap fun. As for a small game, it can absolutely match the price(coz i got it for only 1 RMB hhhhhhhh). it's a real fps game, as what the name called, you just wait(you can also escape) for the attack of insects and shoooooot them without thinking!

to be honest, it's not a 3A game totally, and even not a good game in the eye of 2018's players, but i like it because it make me think of my CHILDHOOD!

at that time i played games in 4399.com and 7k7k.com, which are filled with free small games like [Attcak Of Insects](#), every boring summer day i set before my old computer and spended all my time with them, its really unforgettable memory! now i am an adult, playing expensive beautiful 3A games with nice computer, mama will never beat me for taking too much playing games, but i know, i lost my childhood FOREVER.. RAMPAGE !!!, Clearly a cheaply made game, the modles are a rip off from starship troopers and the voice over is clearly stolen from Unreal Tournament but at 47p you can't complain!

pretty good game.

oddly, but very therapeutic!. Wave-shooter FPS with all Unity assets (well, except for the voiceover from UT). Somewhere between "low-budget Serious Sam" and "Devil Daggers without original assets". Unlike most asset-flip games, though, this is actually reasonably fun to play for a few minutes at a time, and doesn't run like trash.

I got a 90% off coupon from a Steam badge crafting drop, so I paid 10 cents. I recommend it at that price. Maybe even pay the full dollar if you're feeling it.. It may be an asset flip and all, but at least it's cheap, honest about what it provides, and not broken on arrival. I had some fun making a video using this game as an example. [to be fair, this game was okay, but i ran it on the lowest settings i could and it runs at 8 fps average, which makes me want my 10 cents back.. Clearly a cheaply made game, the modles are a rip off from starship troopers and the voice over is clearly stolen from Unreal Tournament but at 47p you can't complain!. Suprisingly fun](#)
