# Boot Disk Maker - Bukis-Project

Windows 3.11 is a member of the Windows for Workgroups family of operating systems that is included on CD-ROMs to create a boot disk. You can find most of the Windows 9x system files on a Windows 3.11 boot disk. The Windows 3.11 boot disk was later upgraded to Windows ME boot disk. Windows Boot CD #2 (Not Puppy Linux). One of the two files you have to add to the boot.ini file is: [1939] NTOSKRNL.EXE=WINDSTALL\NORTONKERNEL\BOOT\NORTONKERNEL.EXE I have also used the Windows 2000 boot disk to access other utilities that I have found here. Problem with Windows 98 for Pro This is an included utility to repair problems on a Windows 98 for Pro. I found it at some web site or somewhere that I don't remember. I am not sure if it does a good job at fixing problems. I found it did the following on my Windows 98: Creates an image of your hard drive. This is your Windows installation image. Creates a temporary Windows installation on your hard drive. Adds the image from step 2 to the temporary installation. Start the temporary installation. If the temporary installation is successful, it will create a Windows 98 install image. Reboot the computer to your old Windows 98 install CD. After booting your Windows 98 install CD, you can follow the process in step 4. Wesley-Preston-Building-Fall-2010/Problems-Repair-Windows-98.jpeg Step 1: Windows Setup Utility Download the windows setup utility and run. On the wizard I added a CD-ROM Drive so that I could install the media. Step 2: Create an image of the system Here is the steps I took: Computer froze after the reboot at 85%. I had to manually shut it off. Step 3: Create a temporary installation Here is the settings from the wizard I used Step 4: Add an image from step 1 Press Next to load the image that is on the CD-ROM Drive. Step 5: Start the temporary installation Here is the wizard that came up Step 6: If the temporary installation is successful, it will create an install image Now run the install image you created from the Windows 98 install
